The GNOME Conference
GUADEC
The Hague, Netherlands
July 26–30th, 2010

GUADEC 2010 Sponsors

GUADEC 2010 wouldn't be possible with the generous support from our sponsors. This page provides an overview of most important sponsors and gives a description of them.

CANONICAL

As a member of the free software community, Canonical is committed to supporting the development of the open source ecosystem. Our employees are passionate about technology, open source and, of course, Ubuntu.

While our main goal is to ensure that Ubuntu continues to be freely available to everyone around the world, we are also focused on building new tools and software to encourage innovation. Projects like Upstart, Apport, Launchpad and Bazaar are just a few examples of our ongoing commitment to initiatives that promote software development and collaboration throughout the community.

Collabora

Collabora is a multinational Open Source consultancy specializing in bringing companies and the Open Source software community together.

We give clients the knowledge, experience and infrastructure to allow them to become an integral part of the Open Source community. We provide a full range of services based around Open Source technologies including architecture, software development, project management, infrastructure and community development. We are skilled in a wide range of areas from consumer devices to multimedia and real-time communications systems. Collabora prides itself in creating a network of Open Source experts from all around the world.

Google

Google's innovative search technologies connect millions of people around the world with information every day. Founded in 1998 by Stanford Ph.D. students Larry Page and Sergey Brin, Google today is a top web property in all major global markets. Google's targeted advertising program provides businesses of all sizes with measurable results, while enhancing the overall web experience for users.

Google is headquartered in Silicon Valley with offices throughout the Americas, Europe, Oceania and Asia.

Learn more at www.google.com.

igalia

Igalia is an open source consultancy specialized in the development of innovative free software technologies and solutions.

Igalia has been increasing its involvement in the GNOME community since the creation of the company nine years ago, contributing with code and documentation to various platform components and applications, and sponsoring and organizing events. Igalia is a member of the GNOME Foundation's Advisory Board.

Besides working in the desktop, the company applies its wide experience on free software, GNOME, WebKit, GStreamer, and other Linux and Freedesktop.org technologies to the mobile market, contributing to different platforms and developing projects for relevant international companies.

Learn more at www.igalia.com.

intel

Intel, the world leader in silicon innovation, develops technologies, products and initiatives to continually advance how people work and live.

Intel Software provides technologies, products and services developers need to create innovative products and industry-leading software solutions on Intel platforms.

Intel has been actively innovating with the open source community and collaborates with commercial vendors to develop Linux and key Open Source solutions.

Lanedo

We believe in open source and we have a passion for it! The developers at Lanedo have delivered infrastructure to the GNOME platform for over a decade and been directly involved in the Maemo & MeeGo platforms. Providing leading expertise and services around the GNOME ecosystem, Linux and Unix in general.

Learn more at www.lanedo.com.

THE LINUX FOUNDATION

Founded in 2007, the Linux Foundation sponsors the work of Linux creator Linus Torvalds and is supported by leading Linux and open source companies and developers from around the world. The Linux Foundation promotes, protects and standardizes Linux by providing unified resources and services needed for open source to successfully compete with closed platforms.

Learn more at www.linuxfoundation.org.

LINUX MAGAZINE

Linux Magazine is a monthly magazine serving readers in over 50 countries.

GUADEC 2010 is sponsored by Linux Magazine International, Germany, Poland and Spain.

MeeGo

Learn more at meego.com.

NOKIA

Learn more at www.nokia.com.

openSUSE

The openSUSE Project is a world-wide project sponsored by Novell that promotes the use of Linux everywhere.

The openSUSE Linux distribution provides everything you need to get started with Linux on the server, desktop, and for mobile computing.

The openSUSE Project is a world-wide community of contributors working together to create and distribute the world's most usable Linux distribution.

Learn more at www.opensuse.org.

redhat

Red Hat, the world's leading provider of open source solutions and an S&P 500 company, is headquartered in Raleigh, NC with over 65 offices spanning the globe. CIOs ranked Red Hat as one of the top vendors delivering value in Enterprise Software for six consecutive years in the CIO Insight Magazine Vendor Value survey.

Red Hat provides high-quality, affordable technology with its operating system platform, Red Hat Enterprise Linux, together with virtualization, applications, management and Services Oriented Architecture (SOA) solutions, including Red Hat Enterprise Virtualization and JBoss Enterprise Middleware.

Red Hat also offers support, training and consulting services to its customers worldwide.

Learn more at www.redhat.com.

UBUNTU user

GUADEC 2010 is sponsored by Ubuntu User United States and Germany.

ARM

ARM designs the technology that lies at the heart of advanced digital products, from wireless, networking and consumer entertainment solutions to imaging, automotive, security and storage devices. ARM's comprehensive product offering includes 32-bit RISC microprocessors, graphics processors, enabling software, cell libraries, embedded memories, high-speed connectivity products, peripherals and development tools.

Combined with comprehensive design services, training, support and maintenance, and the company's broad Partner Community, they provide a total system solution that offers a fast, reliable path to market for leading electronics companies.
